SUMMARY

Frontend Engineer focused on React, Next.js, Angular, and TypeScript, with experience building production web applications, dashboards, and responsive interfaces. Solid JavaScript fundamentals including async patterns, event loop behavior, DOM manipulation, and closures, comfortable debugging framework-independent problems at the language level. Delivered fast, high-performing web apps across travel, AI, and data-management platforms. Also building mobile applications with React Native and Expo. Open to relocation and international opportunities.

SKILLS

- **Domain Skills:** Web Development, UI/UX Design Translation, AI-Driven Development, API Integration, Performance Optimization, Search Engines Optimization, Web Accessibility, Responsive Designs, Cross-Browser Compatibility.
- **Core Skills:** HTML, CSS, JavaScript (ES6+), TypeScript, Sass, Pug, Gulp.js, PHP, Python, C, C++, Git
- **Frameworks/Libraries:** React.js, Next.js (App Router, SSR, SSG, RSC), Angular, Tailwind CSS, Bootstrap, Redux, Zustand, TanStack Query (React Query), React Hook Form, Framer Motion, i18n, Firebase, Supabase, Jest, React Testing Library.
- **Mobile:** React Native, Expo Framework
- **Backend:** Node.js, Express, SQL, MySQL.
- **Soft Skills:** Team Collaboration, Time Management, Self-learning, Attention to Details, Problem Solving, Organization, Agile, Scrum.

WORK EXPERIENCE

Web Developer (Freelancer)

August 2025 –Present

Khamsat | Remote

- Sourced and delivered freelance projects independently, managing client communication, project scope, and end-to-end delivery.
- Enhanced a real estate platform by implementing new features, improving the admin dashboard, resolving complex image upload and data persistence issues, and optimizing responsive UI components using Next.js, TypeScript, PostgreSQL, and Drizzle ORM.
- Resolved backend issues for a client project built with PHP and MySQL, fixed CORS configuration, and handled full application deployment on cPanel, including server and database integration.
- Resolved a domain ownership and DNS configuration issue between **Vercel and Spaceship**, verifying domain ownership via TXT record and successfully connecting the domain to the Vercel-hosted website.
- Developed a Physical Training Website from Scratch with Next.js, starting from planning the MVP, building, testing, doing modifications and improvements, deploying and delivering the website (<https://metnoo.com>).

Frontend Engineer

January 2026 – June 2026

Taqnit Al-M'alamat | Mansoura, Egypt

- Built a travel platform from scratch in Next.js, translating Figma designs into pixel-perfect UIs, responsive interfaces with RTL/LTR support for Arabic and English, and precise attention to details such as spacing, typography, and every interactive state across breakpoints and browsers.
- Improved navigation speed on another travel platform by 70–85% and reached 100% Lighthouse scores in SEO and best practices and 95% in accessibility (WCAG guidelines), by investigating and resolving frontend bugs using browser developer tools across browsers and screen sizes.
- Designed and built a complete dashboard system for data management (CRUD operations), using AI tools like Cursor and Claude to work faster while reviewing all the output before delivering.
- Performed regular code reviews focused on performance, scalability, and maintainability, keeping engineering standards consistent across the project.

Freelance Front-End Developer

September 2025 – October 2025

Aydin Labs | Remote

- Developed interactive dashboard components for an AI Agent and CRM platform using Next.js, TypeScript, and Tailwind CSS.
- Architected the frontend for an AI Image Platform mockup workspace, designing state management with Zustand and building the image-processing and result-display flow in React and Tailwind CSS.
- Integrated frontend with RESTful APIs, implementing data handling logic for image processing and result display.

Web Developer

August 2021 – September 2021

Ipda3 Teck | Mansoura, Egypt

- Collaborated with development teams to deliver software solutions and new features.
- Debugged and tested application code to ensure functionality, stability, and performance.
- Applied foundational knowledge of HTML, CSS, and JavaScript in a professional web development environment.

EDUCATION

Mansoura University

Mansoura, Egypt

Bachelor of Engineering, Major in Communications & Electronics

January 2017 – December 2023

PROJECTS

iQuiz - Quizzes Platform

[Live](#) | [GitHub](#)

Built an interactive quizzes platform using TypeScript, Tailwind CSS, Firebase Authentication, and Webpack, enabling students and mentors to securely sign in and seamlessly build and solve quizzes.

Cinemaniam - Movie & TV Discovery Platform

[Live](#) | [GitHub](#)

Built a responsive, mobile-first movie and TV series discovery platform using React, React Router and TanStack Query, implementing server-state management, caching strategies, and optimistic UI patterns alongside filtering, dynamic routing, and a user-friendly and responsive interface for an engaging experience.

Task Management Application

[Live](#) | [GitHub](#)

Built a task management app with React, Redux, and Vite, featuring task creation, filtering, and persistent local storage for seamless user experience.

Taskaty - Task Management APP

[GitHub](#)

Built a task management mobile app using React Native, Expo, and Supabase, implementing full CRUD operations for task data and integrating a secure authentication system.

TERYAQ - Medication Management Web App

[Live](#) | [GitHub](#)

Developed a responsive medication management web application using React.js and Firebase Real-time Database, integrating Firebase Authentication for secure user sign-in and session management, featuring real-time control, schedule customization, and an accessibility-focused design.
