SUMMARY

Full-Stack Engineer passionate about AI-assisted software development and solving real-world problems through clean, scalable solutions. Experienced in building complete scalable web applications from frontend interfaces to backend services. Delivered fast, high-performing web apps across travel, AI, and data-management platforms. Also building mobile applications with React Native and Expo. Open to relocation and international opportunities.

SKILLS

- **Frontend:** React.js, Next.js, Angular, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Redux, Zustand, TanStack Query (React Query), React Hook Form, Framer Motion, i18n, shadcn/ui, React Native, Expo Framework
- **Backend:** Node.js, Express, REST API Design, SQL, MySQL, MongoDB, Sequelize ORM, Mongoose, Firebase, Supabase, PHP, C, C++, Python
- **Mobile:** React native, Expo Framework
- **Tools & Workflow:** Git, Sass, Webpack, Gulp.js, Pug, Jest, React Testing Library
- **Domain Skills:** Web Development, UI/UX Design Translation, AI-Assisted Development, API Integration, Performance Optimization, SEO, Web Accessibility, Responsive Design, Cross-Browser Compatibility
- **Soft Skills:** Team Collaboration, Problem Solving, Attention to Details, Time Management, Self-learning, Agile, Scrum

WORK EXPERIENCE

Web Developer (Freelancer)

August 2025 - Present

Khamsat | Remote

- Delivered freelance projects independently, managing client communication, project scope, and end-to-end delivery.
- Enhanced a real estate platform by implementing new features, improving the admin dashboard, resolving complex image upload and data persistence issues, and optimizing responsive UI components using **Next.js, TypeScript, PostgreSQL, and Drizzle ORM**.
- Resolved backend issues for a client project built with **PHP** and **MySQL**, fixed **CORS configuration**, and handled full application deployment on cPanel, including server and database integration.
- Resolved a domain ownership and DNS configuration issue between Vercel and Spaceship, verifying domain ownership via TXT record and successfully connecting the domain to the Vercel-hosted website.
- Developed a Physical Training Website from Scratch with **Next.js**, starting from planning the MVP, building, testing, doing modifications and improvements, deploying and delivering the website (<https://metnoo.com>).
- Customized and optimized a **Shopify e-commerce** theme store using Liquid, JavaScript, and Shopify's theme architecture, with a focus on **performance, accessibility, RTL Arabic support, and responsive UX**. Also, configured integrations with third-party shopify apps.
- Resolved a critical **WordPress/PHP production issue** on a live website, gaining hands-on experience with **cPanel, server administration, PHP configuration, security, and backup/recovery**.

Frontend Engineer

January 2026 - June 2026

Taqnit Al-M'alamat | Mansoura, Egypt

- Improved navigation speed on a travel platform by 70 - 85%, resolving critical frontend and backend integration issues to strengthen load times, user experience, and overall system stability.
- Built travel platforms from scratch using Next.js App Router, including almounafis.com and zahabweawdeh.com, following a feature-based architecture and reusable components, translating Figma designs into pixel-perfect, responsive interfaces with precise attention to spacing, typography, and every interactive state across breakpoints and browsers.
- Integrated RESTful APIs built on Node.js services, implementing data-fetching logic, error handling, and loading states across the full application.
- Implemented full RTL/LTR layout support for Arabic and English interfaces
- Reached 100% Lighthouse scores in SEO and best practices and 95% in accessibility following WCAG guidelines by applying performance optimization techniques and modern web standards.
- Designed and built a complete dashboard system with full CRUD operations, integrating backend APIs and actively using AI tools (Cursor, Claude)

Freelance Full-Stack Developer

September 2025 - October 2025

Aydin Labs | Remote

- Developed interactive dashboard components for an AI Agent and CRM platform using Next.js, TypeScript, and Tailwind CSS.
- Architected the complete frontend for an AI Image Platform mockup workspace, designing state management with Zustand and building the full image-processing and result-display pipeline in React and Tailwind CSS.
- Integrated frontend with RESTful APIs, implementing data-handling logic, authentication flows, and result display for image processing features.

Web Developer

August 2021 - September 2021

Ipda3 Teck | Mansoura, Egypt

- Collaborated with development teams to deliver software solutions and new features.
- Debugged and tested application code to ensure functionality, stability, and performance.
- Applied foundational knowledge of HTML, CSS, and JavaScript in a professional web development environment.

EDUCATION

Mansoura University

Mansoura, Egypt

Bachelor of Engineering, Major in Communications & Electronics

January 2017 - December 2023

PROJECTS

Bundle Builder - Home Security System Configurator

[Live](#) | [GitHub](#)

Built a full-stack home security bundle configurator using *React 19*, *TypeScript*, *Redux Toolkit*, *Tailwind CSS*, *Node.js*, and *Express*, enabling users to customize cameras, monitoring plans, and sensors through a guided multi-step workflow. Implemented real-time pricing, bundle discounts, centralized state management, REST API integration, and an accordion-based UI following reusable component architecture and separation of concerns.

Online Shop - Full-Stack (Backend-Focused)

[GitHub](#)

A full-stack, backend-focused application for an online shop built using *Node.js*, *Express*, *MySQL*, *Sequelize*, and *EJS*. The project follows the MVC (Model-View-Controller) architecture to maintain clean, scalable, and manageable code.

TERYAQ - Medication Management Web App

[Live](#) | [GitHub](#)

Developed a full-stack medication management web application using *React.js*, *Node.js*, and *Firebase Realtime Database*, integrating *Firebase Authentication* for secure user sign-in and session management, featuring real-time control, schedule customization, and an accessibility-focused design.

Cinemanian - Movie & TV Discovery Platform

[Live](#) | [GitHub](#)

Built a responsive, mobile-first movie and TV series discovery platform using React, React Router and TanStack Query, implementing server-state management, caching strategies, and optimistic UI patterns alongside filtering, dynamic routing, and a user-friendly and responsive interface for an engaging experience.

iQuiz - Quizzes Platform

[Live](#) | [GitHub](#)

Built an interactive quizzes platform using *TypeScript*, *Tailwind CSS*, *Firebase Authentication*, and *Webpack*, enabling students and mentors to seamlessly build and solve quizzes with secure user management.

Task Management Application

[Live](#) | [GitHub](#)

Built a task management app with *React*, *Redux*, and *Vite*, featuring task creation, filtering, and persistent local storage for seamless user experience.

Taskaty - Task Management APP

[GitHub](#)

Built a task management mobile app using React Native, Expo, and Supabase, implementing full CRUD operations for task data and integrating a secure authentication system.
